R. I. Horticultural Society Gold Medal
A. G. S. Silver Medal

SAUNDERS GARDENS BULBS ARE GROWN FOR BLOOM

Wholesale price for planting stock and bulblets on application.

It is essential a bulb should be of blooming age rather than size; the largest bulbs do not always give the best results.

Many of the best varieties produce small bulbs and in buying a mixture you should find it much better when the size of the bulbs vary to a considerable degree.

THE PRIMULINUS VARIETIES. "The Maid of the Mist." The most dainty and decorative of the Gladiolus family—and are growing more in favor by all lovers of the beautiful in flowers. In the vase, the basket, separately or in combination with foliage, the "Prims" rival the choicest orchids for decorative effect.

For cut flowers it is best to cut them in the morning, leaving four leaves on the stock to mature the bulb; place the flowers in cool fresh water. Each morning cut off the stem, remove the wilted flowers and change the water in the vase.

Learn to know the flowers by their name, thereby giving them a personality at blooming time.

Per Doz.  

ALICE TIPLADY: Very choice large Primulinus, most beautiful saffron................. $1.00
